

You might have heard of Coronavirus or COVID-19:

- It is like a flu or bad cold

- It can make you very sick.

Able Australia wants to make sure you don't get sick.

Make sure you keep your hands really clean

Tell someone if you are feeling sick

We will check your temperature every day just to be sure you are ok

If lots of people get sick you might need to stay at home for a while

Able Australia will do our best to take care of you

We have written a letter explaining what we need you to do.

Ask someone to read the letter with you.

If you have any questions ask an Able Australia person
